I know how businesses run, and I build the software they depend on.

More than two decades managing a company's accounting and administration, then years building enterprise frontends: both shape how I work today.

Software engineering

Sole frontend developer in two consecutive jobs since August 2021.

Sofycom, S.L. · Front-End Web Developer
May 2024 – present · Vigo

Enterprise applications built as PWAs with Ionic, with specific desktop and mobile views. Decisions, implementation and evolution of the frontend; interfaces and internal management tools.

Rodapro, S.L. · Front-End Web Developer
August 2021 – May 2024

Management applications, dashboards and business interfaces, with tool integration and reporting. Autonomous responsibility for the frontend from the start.

Independent client work · Web development for clients
September 2020 – present

Websites and the frontends of two business applications for clients: an operational dashboard for a workplace risk prevention company and the management of municipal notification delivery.
